Summary

Front-End Software Engineer with experience in developing scalable applications, intuitive UI/UX, and performance optimization. Expert in React, Next.js, TypeScript, testing with Jest, and React Testing Library. Strong experience in agile teams with Scrum and Kanban, as well as experience in CI/CD, monitoring, and observability with New Relic and Open Telemetry.

Over the years as a Front-End Engineer, I have always valued developing user-friendly, intuitive, and easy-to-interact applications. I always seek to exchange ideas and be proactive, actively collaborating with designers and PMs, as I believe that a good user experience is achieved through a lot of exchange and ideation between teams.

Main Skills

Throughout my career, I have been observed to be proactive, multidisciplinary, communicative, a team player, creative and have a systemic mindset. Always participating in agile teams, I continue to improve myself and expand my skills every day. Among the main stacks I have experience with, the following stand out: JavaScript (ES6+), TypeScript, React (Hooks, Context API, Server Components), Next.js (App Router, SSR, ISR), Node.js, HTML5, CSS3, Tailwind, Bootstrap, Material UI, Chakra UI, Styled Components.

Testing and Quality: Jest, React Testing Library e Cypress
APIs & Back-End: REST APIs, MariaDB, Liquid
Versioning and DevOps: GitHub, GitLab, Bitbucket, CI/CD
Observability: New Relic, Splunk, Open Telemetry, Grafana, Apdex
Agile Methodologies: Scrum, Kanban

Professional Experience

Front-end Software Engineer.   Pagbank   Aug/2024 – Atualmente

- I implement frontend solutions using React, Next.js, Javascript and TypeScript, integrating REST APIs, perform unit tests, keep documentation up to date, perform Code Reviews and always try to improve existing code in order to ensure code quality and good development practices.

Main value deliveries: Redesign of the application layout, facilitating the user's journey in creating payment links and their interactions. Creation of dashboards and alarms in New Relic, improving application performance, reducing failures and improving the user experience.

Full Front End Developer.   Bazk/Safepag   Sep/2022 – May/2024

- As a Frontend Developer, I was primarily responsible for the frontend development of several of the company's projects, using React and Typescript, in addition to refactoring legacy code. Some implementations were: payment engine, migration of legacy code to a new payment platform, eFx module for foreign exchange remittances, compliance module and KYC.

Main value deliveries: Compliance capacity in all transactions and end-to-end monitoring of the client and their transactions, inputs and outputs.
